

# **PROJECT REPORT**

## **ELECTRICITY BILLING**

## **MANAGEMENT**

### **INTRODUCTION-:**

The “Electricity billing management” has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

### **AIM-:**

The aim of our project is to develop a system that is meant to partially computerize the work performed in the Electricity Board like generating monthly electricity bill, record of consuming unit of energy, store record of the customer and previous unpaid record.

## **Front-End**: Html/CSS

The interface provides login for Admin and Customer.

Customer proceeds further by using consumer number. The entire interface is monitored by the admin.

Customers can create an account, pay electricity bills and provide necessary feedback.

## **Back-End**: MySQL

Our project entitled "Electricity billing system " uses My SQL as Back-End database .

A back-end database is a database that is accessed by users indirectly through an external application rather than by application programming stored within the database itself or by low level manipulation of the data (e.g. through SQL commands).

The database is sorted out into eight tables they are a\_ccount ,a\_dmin ,billing , customer, electricity board ,feedback , invoice, tariff.

## **Table schema:**

### **Table name: a\_dmin**

Field name	Type	Index	Description
admin_id	int(10)	Primary key	Admin id
admin_name	varchar(25)	Not null	Administrator name
login_id	varchar(25)	Not null	Admin login id
a_password	varchar(25)	Not null	Admin password
admin_type	varchar(25)	Not null	Login type- Admin or employee
admin_status	varchar(10)	Not null	Admin status

### **Table name: tariff**

Field name	Type	Index	Description
tariff_id	int(10)	Primary key	Tariff ID
tariff_type	varchar(50)	Not null	Tariff types
tariff_description	text	Not null	Tariff description
tariff_status	varchar(10)	Not null	Tariff status

## Table name: customer

Field name	Type	Index	Description
customer_id	int(10)	Primary key	Customer ID
customer_name	varchar(50)	Not null	Customer name
account_type	varchar(25)	Not null	Account type
address	text	Not null	Customer address
email_id	varchar(25)	Not null	Customer Email ID
c_password	varchar(25)	Not null	Customer password
customer_status	varchar(10)	Not null	Customer status

## Table name: a\_ccount

Field name	Type	Index	Description
account_id	int(10)	Primary key	Account ID
cust_id	varchar(25)	Foreign key	Customer ID
cus_name	varchar(50)	Not null	Account holder name
rr_number	varchar(25)	Not null	Account RR number
account_status	varchar(10)	Not null	Account status
Electricityboard_id	Int(10)	Foreign Key	Electricity Board ID

## Table name: billing

Field name	Type	Index	Description
billing_no	int(10)	Primary key	Bill number
payment_mode	varchar(25)	Not null	Payment mode from billing table payment_date
payment_date	date	Not null	Bill amount Paid date
payment_time	time	Not null	Bill amount Paid time
bill_amount	float(10,2)	Not null	Total bill amount
paid_amount	float(10,2)	Not null	Total paid amount
excess_amount	float(10,2)	Not null	Excess paid amount
billing_status	varchar(10)	Not null	Billing payment status
cus_id	Int(10)	Foreign Key	Customer ID
Account_id	Int(10)	Foreign Key	Account ID

## Table name: invoice

Field name	Type	Index	Description
invoice_id	int(10)	Primary key	Invoice ID
bill_no	varchar(25)	Not null	Receipt bill number

reading_date	date	Not null	Electricity meter reading date
present_reading	float(10,2)	Not null	Present reading detail
previous_reading	float(10,2)	Not null	Previous reading detail
consumption_unit	float(10,2)	Not null	Consumption unit detail
in_fixed_charge	float(10,2)	Not null	Minimum fixed charge
energy_charge	float(10,2)	Not null	Energy charge
tax	float(10,2)	Not null	Tax amount in total
bill_amount	float(10,2)	Not null	Total bill amount
interest	float(10,2)	Not null	Interest in percentage
previous_balance	float(10,2)	Not null	Previous balance amount
interest_prebalance	float(10,2)	Not null	Previous interest balance amount
credit	float(10,2)	Not null	Credit amount
concession	float(10,2)	Not null	Any concession
net_amount	float(10,2)	Not null	Grand total
due_date	date	Not null	Last date of bill payment
invoice_status	varchar(10)	Not null	Invoice status
account_id	Int(10)	Foreign Key	Account ID
tariff_id	Int(10)	Foreign Key	Tariff ID

electricityboard_id	Int(10)	Foreign Key	Electricity board ID
---------------------	---------	----------------	-------------------------

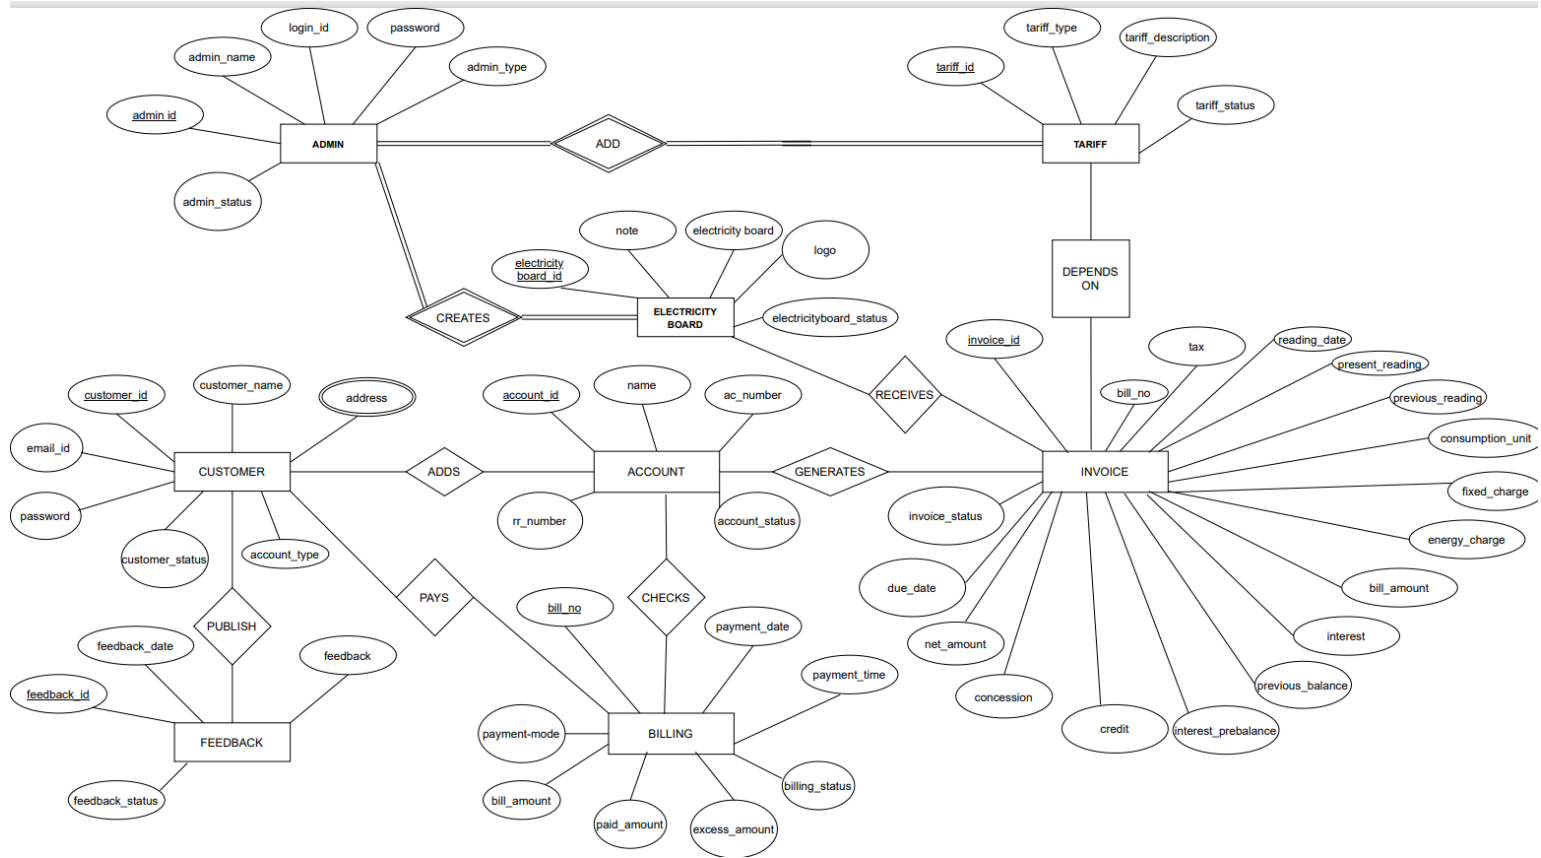

**Table name: electricityboard**

Field name	Type	Index	Description
electricityboard_id	int(10)	Primary key	Electricity board ID
electricityboard	varchar(25)	Not null	Electricity board
logo	varchar(100)	Not null	Electricity board logo
note	text	Not null	Any additional Note
electricityboard_status	varchar(10)	Not null	Status

**Table name: feedback**

Field name	name	Index	Description
feedback_id	int(10)	Primary key	Feedback ID
feedback	text	Not null	Feedback details
feedback_date	date	Not null	Feedback date
feedback_status	varchar(10)	Not null	Feedback status
cust_id	Int(10)	Foreign Key	Customer ID
